FEBRUARY 2017 ❤️

## Alicia's Vacation Gr. 6

Surprisingly, I arrived in India. I enjoyed lots of it. But it's very dirty, people spit and a lot of people are poor. That's how we can all reflect that we are lucky to live in Canada. I saw St. Mother Teresa's house and went on scooter rides and also reunited with family. My dad got emotional a bit but it was a cool experience.

## Black History Month

Rosa Parks was an African American who stood up for her rights as a human being and in doing so helped bring the day where black people were finally free.

Back in the 1900's there were designated areas for blacks and whites – even on a bus. Rosa decided to sit in the part of the white area (the front), and was noticed by the driver. She resisted the driver telling her to sit in the back, even when the white person said it was alright when the bus filled up. Her actions inspired African Americans to stand up for they thought was right, and without her help, it might not have been so easy. She is still revered as a hero today, for

## Inquiry for the Month

### *Why does steam come out of your mouth in the cold weather?*

- It's the circle of life. Zyrhus Gr. 6
- Steam comes out because when you breathe hot air comes out and the hot air vaporizes and creates steam. Sean Gr. 4
- Because when wind(cold) and carbon dioxide mix together it becomes steam Vivienne Gr. 5
- I think because of condensation Maile Gr. 6
- Steam is actually gas (carbon dioxide) and in cold or hot environments creates steam, like for example when you're cooking, steam comes from the food. Jaden Gr. 5
- Because of water vapor Angela Gr. 5
- Because the steam has water molecules which freezes when it comes out. Cassandra Gr. 5
- The steam comes out because you breathe cold air and hot air comes out. Sofia Gr. 2
- I think steam from when you breathe outside is caused by your breath/ carbon dioxide being warm mixing with the cold air outside making a reaction turning into steam. Noa Gr. 4
- Because when you breathe is warm and the air is cold so this combination creates vapor. Noah Gr. 4
- It's the form of how your body tries to keep warm. Jacey Gr. 7
- Because when you breathe carbon dioxide comes out so warm and cold air mix=fog Dylana Gr. 4

## **VALENTINES DAY SPECIAL**

BY Sofia and Dylana

Once upon a time there was a girl and boy who loved each other. One day the girl and boy were in the same class and they were getting older. The boy had an idea when they were older they will marry each other. One day they heard a sound, so they followed the sound. It lead them to a wolf. They ran away from the
