PHOTOGRAPHY SPECIAL April 2017

This month the children were given cameras and put in groups. We had a photography contest and took pictures of nature and each other. The children got to enjoy photography and each other. They learned to pose,

The children made special Easter crafts with paint and egg cartoons. They also cooked muffins with the help of the teachers and judged the photography contest. This helped their cognitive development and self-esteem. They also learned to self-regulate when having problems with the camera.
