

DaVinci Pencil Bridge

Our engineers successfully constructed a DaVinci Bridge out of only pencils. The "bridge" was self-suspended and could support a considerable amount of weight.

Rainbow Paper

This rainbow paper activity demonstrates how thin film interference works when black construction paper is dipped in just plain water and clear nail polish.

Helicopters

Our little construction workers built these helicopters using hammers and nails

Milk Magic

Milk Magic science experiment demonstrated how soap molecules as a degreaser repelled the fat molecules in the milk. Food colour was used to highlight this reaction.

REACTIONS

"That is so cool! I'm going to go home and show my baby sister" – Mikar

Yum...

Yummy, gooey s'mores made a fun treat!

REACTIONS

"Look how gooey my marshmallow is!" – Morgan

"More s'mores please!" – Myles

"This is so sticky!" – Miranda

A fast and easy way to make pizza! All you need is tomato sauce, cheese, and some buns!

Building healthy and nutritious Parfaits using yogurt, granola and berries!
