

JAMES ROBINSON CHILDCARE CENTRE

LEARNING EXPERIENCES SEPTEMBER 2021

SAND PLAY:

S1: Let's build a sand castle.

S2: Okay let's all work together to create a castle with a fort.

The children in our centre love to play outdoors in our sand pit. In this learning experience the children worked together to create sand structures specifically a “castle and fort”. They worked together using their problem solving skills showing a sense of belonging as they connected with each other. They also were actively engaged in meaningful creative play showing their sense of expression as they came up with very imaginative ideas. This was a child directed activity and as teachers we facilitated by asking questions and engaging with the children in this creative play.
