## Month of September 2021

### Learning Experience: 100m Race

The children were emulating the 100m race from the Summer Olympics. They made two groups, a junior team and a senior team. The teams would take turns to race. Both teams were very supportive of each other. They would cheer the players while they were racing and also congratulate them on their win.

After a few races the children realized that instead of two teams racing separately, they can join with each other and have a relay race.

The children that were not in the race also got engaged in watching the race, it became a fully engaging race event where everyone participated in some way.

Child K: "Teacher A, can you call the race for us?"

Teacher A: "Sure. Everyone get ready. Ready, Set... Go!"

Child K (not in the race): "Go, go, go, go, go!"

Child M: "Wow, they are so fast!"

Child K1 (finished first): "Good race, Z."

Child Z (finished second): "Yea, you are so fast, but I always caught up to you at the end. K2 was fast too, he was very close."

Child K2 (finished third): "Yea I was close, I can do better on the next race."

Child K1: "Yes, let's all do better on the next one."
